MUHAMMAD MUHID

SOFTWARE ENGINEER

Nazimabad no. 4 | +92(315)2091610 | muhammadmuhid42@gmail.com | linkedin.muhammad-muhid/

SUMMARY

Software Engineer who builds and maintains internal business dashboards. Recently rebuilt a company's reporting system from PHP/MySQL onto Next.js and Supabase, and now maintain it — the data, the integrations and the daily automation that keeps it running. I also build workflow automation using Zapier, GoHighLevel and webhooks. Started in WordPress and front-end development, now working across the full stack.

WORK EXPERIENCE

Software Engineer | Thecwaly **July 2026 - Present**

- Migrated a live internal BI platform from PHP/MySQL to Next.js and Supabase — 47 tables, 28 webhooks, 7 scheduled jobs — with no downtime.
- Directed AI coding tools through the rebuild while owning requirements, verification and final sign-off on every page.
- Reconciled every dashboard figure against the legacy system before cutover to guarantee parity.
- Traced silent webhook failures that were dropping records, and blocked a proposed data backfill after finding the source data was itself corrupt.
- Built an admin panel for managing Facebook API accounts and credentials, with server-side token masking.
- Built and maintain Zapier and GoHighLevel automations feeding the platform's data pipelines.

CMS Developer | HZ Tech **Feb 2026 - June 2026**

- Designed and customized responsive websites using Elementor, Divi, Kadence, WPBakery, HTML, CSS, and JavaScript based on Figma & PSD designs.
- Integrated ACF (Advanced Custom Fields) with PHP to create and manage dynamic content for custom post types.
- Developed and managed forms using Forminator.
- Built landing page sections on Go High Level (GHL) as per design requirements.
- Customized Shopify theme-based websites for layouts and page functionality.

Wordpress Developer | KGT Global **Sep 2025 - Feb 2026**

- Designed and customized websites using Elementor and Divi Builder, ensuring pixel-perfect and responsive layouts.
- Integrated ACF and Dynamic Content for managing custom post types such as Posts and Projects within the Theme Builder.
- Worked with WooCommerce for product uploading, category creation, and product page customization.
- Configured and used important WordPress plugins like WooCommerce, ACF, and Forminator for enhanced functionality

EDUCATION

Sir Syed University of Engineering & Technology **2021-2025**

Bachelor of Science in Information Technology
CGPA : 3.54

- Silver Medalist (2nd Position in degree program)
- Awarded scholarships twice for academic excellence

INTERMEDIATE **2019-2021**

Govt.Jinnah College

SKILLS AND CERTIFICATIONS

- **Front-End Development:** WordPress**,** HTML5, CSS3, JavaScript (ES6+), Bootstrap, Tailwind CSS.
- **Languages**: C++, C#, JavaScript, Python, SQL.
- **Automation:** Webhooks, Zapier, GoHighLevel, Close CRM.
- **Concepts:** OOP (Object-Oriented Programming), Programming Fundamentals, Responsive Design, Cross-Browser Compatibility.
- **Networking:** Router & Switch Configuration, Servers, Subnetting, VLANs, Protocols, VM, Hypervisors.
- **Certifications:** Computer Networks – Certified (CNA), Python – Certified (CNA), JavaScript – Certified (CNA), Front-End Web Development –Certified (Udemy)

PROJECTS

- **School Management System:** Developed a School management system using SQL Server and C#, featuring a user-friendly interface, and data validation mechanisms.
- **Network University Management System:** Creating a network topology using Cisco Packet Tracer, Hierarchical Network Design, Connecting Networking devices with Correct cabling, Creating VLANs and assigning ports VLAN numbers, Subnetting and IP Addressing.
- **Projects:**
  - carrworldtravel.com | Live (Divi, ACF, HTML, CSS, JS, HTML, Forminator)
  - lesscode.io | Live (Elementor, ACF, HTML, CSS, JS,)
  - Dashboard (Next.js ,Supabase)
